

Aqua-Boy: Compression Screw Electrodes

This electrode with a friction clutch allows adjustment of a constant pressure. For measuring materials in sheet form such as: cardboard, paper, leather, textiles or veneers.

Technical Data

Dimensions: 5" x 4" x 2 3/4"

Weight: 3 lbs

Designed for: PMI, PMII, ZPI, ZPIII, BAFI, LMI, LMIII, SPI Aqua-Boy

N.B. This electrode requires a universal cable to attach to the Aqua-Boy meter and will not function on its own.

Ordering Data

201

This electrode is designed for accurate through-measurements of up to 1 3/16" thick. The adjustable spike allows moisture gradient measurements.
