

Aqua-Boy: BMI

The BMI is a highly accurate and portable moisture meter with an additional centesimal and drying scale specifically designed for timber and wood manufacturing. With instantaneous analogue readings and compatible electrodes, this device has numerous applications for the construction and lumber industry.

Technical Data

Meter type: moisture meter

Measuring scale: 5...24%

Additional scale: centesimal

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: cement, wood cement, aerated cement, plaster, gypsum, lime mortar, parquet, floorboards, doors and window frames

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 203 b, 203 d, 208, 223, 226

Industry Usage

Lumber, Construction
