

Aqua-Boy: FLI

The FLI is a highly accurate and portable moisture meter specifically designed for fishmeal manufacturing. With instantaneous analogue readings and compatible electrodes, this device has numerous applications for the agricultural and food processing industry.

Technical Data

Meter type: moisture meter

Measuring scale: 4...14%

Additional scale: none

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: fishmeal

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 202, 202 T, 209 d

Industry Usage

Agriculture, Food processing

Ordering Data

FLI

299-FLI: calibration resistor
