

Aqua-Boy: GEMI

The GEMI is a highly accurate and portable moisture meter specifically designed for grain and cereal manufacturing. With instantaneous analogue readings, a centesimal scale and compatible electrodes, this device has numerous applications for the agricultural and food processing industry.

Technical Data

Meter type: moisture meter

Measuring scale: 9...22%

Additional scale: centesimal

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: agricultural products, cereals, coffee, cornstarch, flour, food products, hay, hops, moulding powder, provisions, seeds, spices

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 202, 209 a, 202 T, 209 b

Industry Usage

Agriculture, Food processing

Ordering Data

GEMI

GEMI-set: moisture meter and 202 cup electrode

299-GEMI: calibration resistor
