

# Aqua-Boy: HOPII

The HOPII is a highly accurate and portable moisture meter specifically designed for hop manufacturing. With instantaneous analogue reading, a centesimal scale and compatible electrodes, this device has numerous applications for the agricultural and food processing industry.

## Technical Data

**Meter type:** moisture meter

**Measuring scale:** 6...28%

**Additional scale:** centesimal

**Accuracy:** +/- 0.1%

**Reproducibility:** 0.2%

**Display:** analogue

**Power supply:** 9v battery

**Products measured:** hops

**Dimensions (WxHxL):** 115mm x 50mm x 170mm

**Recommended electrodes:** 202, 209 a, 209 b

## Industry Usage

Agriculture, Food processing

## Ordering Data

HOPII

HOPII-set: moisture meter and 202 cup electrode

299-HOPII: calibration resistor
