

Aqua-Boy: MSIV

The MSIV is a highly accurate and portable moisture meter specifically designed for corn manufacturing. With instantaneous analogue readings, a centesimal scale and compatible electrodes, this device has numerous applications for the agricultural and food processing industry.

Technical Data

Meter type: moisture meter

Measuring scale: 5...12%

Additional scale: centesimal

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: corn, cornstarch, moulding powder

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 202 T, 209 a

Industry Usage

Agriculture, Food processing

Ordering Data

MSIV

MSIV-set: moisture meter and includes 202 T cup electrode

299-MSIV: calibration resistor
