

Aqua-Boy: TEMI

The TEMI is a highly accurate and portable moisture meter specifically designed for wool, rayon and cotton manufacturing. With instantaneous analogue readings, a centesimal scale and compatible electrodes, this device has numerous applications for the textile industry.

Technical Data

Meter type: moisture meter

Measuring scale: 2.5...24.5%

Additional scale: centesimal

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: cotton, felt, yarn, polyester, polypropylene, wool, rayon, linen, leather

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 205, 206, 207, 210, 212

Industry Usage

Textile
