

Aqua-Boy: TFRI

The TFRI is a highly accurate and portable moisture meter specifically designed for nut manufacturing. With instantaneous analogue reading, a centesimal scale and compatible electrodes, this device has numerous applications for the food processing industry.

Technical Data

Meter type: moisture meter

Measuring scale: 4...22%

Additional scale: centesimal

Accuracy: +/- 0.1%

Reproducibility: 0.2%

Display: analogue

Power supply: 9v battery

Products measured: almonds, brazil nuts, hazel nuts, peanuts, walnut kernels

Dimensions (WxHxL): 115mm x 50mm x 170mm

Recommended electrodes: 202, 207 a

Industry Usage

Food processing

Ordering Data

TFRI

TFRI-set: moisture meter and 202 cup electrode

299-TFRI: calibration resistor
